## BIOGRAPHY

LARCHES is a project of Jacob Cona, a musician from Athens, GA. He was raised on Elephant 6, R.E.M., and the B-52's, and he eventually moved to Seattle in hopes of exploring greener musical pastures. After several productive months, beginning at the start of the pandemic, Jacob emerged from a bedroom-turned-home studio with his debut album "Attack of the Telephones." With this album, Larches introduces a strange and enigmatic world where the mundane morphs into the surreal, documenting a hallucinogenic landscape of isolation, loneliness, and hope, inhabited by painted corpses, cowering gods, and friends that have transformed into telephones. Larches has evolved into a live act supported by Adrian Franco, Robby Fox, and Jacob Conley. They are currently performing around the Pacific Northwest and working on Larches' sophomore album.

**Genre:** indie rock, roots pop, psychedelic rock

**Similar Artists:** Built to Spill, The Olivia Tremor Control, Elliot Smith, Sparklehorse
